The Smart Beginners Guide to Vegan Soapmaking Susan Henny 2013-11 I Think The Babylonians Were Onto Something.... This craft was first mastered by the Babylonians way back in 2800 B.C. This is why we find that so many people are very interested in learning how to make their own soap. Vegan soap is slowly gaining popularity, and there are many reasons for this. First of all, there is the fact that there are absolutely no additives to be found in homemade vegan soap that can be harmful to the skin. Who Says That There's No Short-cuts to Soap & Glory? Best Tips And Tricks For Soap Making Sandy Chase 2013-09-24 It's interesting to note that there have been many healthy human populations throughout our history, even long before the advent of antibacterial soap. In fact, the collective fascination with adding chemical ingredients to bar and liquid soaps in order to help fight infections only began in recent decades. Since then, much evidence has emerged to suggest that antibacterial

soaps don't clean us any more thoroughly than their "old-fashioned predecessors" do. What's more, they may pose health concerns both on personal and environmental levels. This is why Sandy Chase decided to write *Best Tips and Tricks for Soap Making*. The most disturbing concern is that these new kinds of cleansers may actually contribute to a general sanitation problem by promoting the development of antibiotic-resistant bacteria. Antibacterial soaps don't just kill disease-causing bacteria. They kill every kind of bacteria that is susceptible to them. If resistant bacteria were then to form, they could easily dominate their surrounding environment (be it a household or larger ecosystem) due to a lack of competition. Our race survived for eons and produced many healthy men and women without the aid of our new bacteria-fighting products. Babies even need a certain level of exposure to germs in order for their immune systems to develop properly. Evidence suggests that we may be compromising our own adult systems as well through our increasing reliance upon antibacterial soaps. In a way, this reliance reveals a certain distrust of our environment (which is seen as hostile) and our bodies (which are seen as overly vulnerable). We may need to start trusting ourselves - and the kinds of natural products that kept us clean for so long in the past - once again.

DIY soap is loaded with natural and aromatic products that are better for your skin, that of you loved ones and the planet. We've gathered easy homemade soap recipes for beginners, including shampoo soap bars. Before you begin, here's a quick tutorial about the chemistry behind making soap. To make soap completely from scratch (as opposed to melt and pour with premade soap bases), you'll need to use lye, which is a caustic salt known as sodium hydroxide. The pure luxury of soaps made with coconut butter, almond oil, aloe vera, oatmeal, and green tea is one of life's little pleasures. And with the help of Shelley Brander, the author of Pure Soap Making with East Guideline, it's easy to make luscious, all-natural soaps right in your own kitchen. This collection of various recipes ranges from simple castile bars to intricate swirls, embeds, and marbled and layered looks. Begin with a combination of skin-nourishing oils and then add blueberry puree, dandelion-infused water, almond milk, coffee grounds, mango and avocado butters, black tea, or other delicious ingredients - and then scent your soap with pure essential oils. Step-by-step photography guides you through every stage of cold-process soap making. Start from scratch with colorants and fragrances that are free of artificial ingredients. You'll discover how to transform your soap making supplies into basic bars, Castile soap, shampoo bars, salt soaps, milk soaps, and more.
