[eCommerce Economics](#) David VanHoose 2011-03-18 This second edition of eCommerce Economics addresses the economic issues associated with using computer-mediated electronic networks, such as the Internet, as mechanisms for transferring ownership of or rights to use goods and services. After studying this book, students will recognize problems that arise in the electronic marketplace, such as how to gauge the competitive environment, what products to offer, how to market those products, and how to price those products. They also will understand the conceptual tools required to evaluate the proper scope of public policies relating to electronic commerce. Core topics covered in the book include the underpinning of electronic commerce and the application of basic economic principles, including the theories of perfect and imperfect competition, to the electronic marketplace. Building on this foundation, the book discusses virtual products, network industries, and business strategies and conduct. Additional key topics include Internet advertising, intellectual property rights in a digital environment, regulatory issues in electronic markets, public sector issues, online banking and finance, digital cash, international electronic trade, and the implications of e-commerce for aggregate economic activity.

E-commerce Law and Practice in Europe Ian Walden 2001-04-27 With the massive explosion of e-commerce,
and especially the use of the Internet as a transnational and instant medium for business transactions,
has come a whole range of new laws and regulations - and, inevitably, a minefield of accompanying
uncertainties and potential pitfalls. So what exactly are the legal issues companies need to address, and
what are their implications in real terms for the business world? Find the answers in this groundbreaking
study undertaken for the European Commission within the framework of the ECLIP project. With a brief to
provide practical help for businesses and e-commerce initiatives, this series of cutting-edge reviews
examines and evaluates the special rules designed to regulate the Internet - both at a European and at

national level in the Member States. It also explains the relevant technological developments and evaluates them against the legal background. This is an essential guide for legal and corporate practitioners alike, as well as software developers and the consultancy community internationally. A publication of the ECLIP network

Study Guide for Miller/Jentz's Business Law Today, Standard Edition Miller/Jentz 2004-12

E-commerce & Information Technology in Hospitality & Tourism Zongqing Zhou 2004 The travel professional who wants to stay on the cutting edge will find this to be a great resource. Employing the concepts, ideas and technologies discussed in this book will dramatically improve customer service and marketing in this age of technology. Through the practical use of examples and case studies, the author provides an extensive review of the Internet as an agent of change in hospitality and tourism information technology and commerce. "E-Commerce and Information Technology in Hospitality and Tourism" contains essential information about business-to-business and business-to-consumer e-commerce models, and about marketing schemes and strategies used by various sectors of the industry. A discussion of e-commerce answers questions about reliability, privacy and security as they relate to Internet transactions. Travel professionals will benefit from a detailed review of the Internet's impact on various sectors of the industry including travel agencies, airlines, hotels, cruise lines, bed and breakfasts, online travel stores and more. The author rounds out the book with a glossary of terms, chapter highlights and leads to valuable resources available on related Web sites, as well as a discussion of the future use of technology in the industry.

The Status Quo of E-Commerce. A Theoretical and Practical Approach to Consumer-Behaviour in E-Commerce Kai Eickhof 2005-10-13 Seminar paper from the year 2005 in the subject Business economics - Trade and Distribution, grade: 1,8, University of Hamburg (Anglistik und Amerikanistik), course: Business English No.5 "Consumer Behaviour", 44 entries in the bibliography, language: English, abstract: Electronic commerce (short: e-commerce) is becoming more and more important in our world. In the beginning, only start-up companies had established online business, but nowadays, even the old economy has realized that e-commerce can be profitable and can make a company operate more efficiently. However, the reasons for or against going into e-commerce should not be discussed in this paper. Many companies have started e-commerce and still today many others try to start online business successfully. As a result, e-commerce has quite a big impact on companies and their customers. This paper shall work out theoretical and practical insights into the behaviour of online consumers. Therefore, in chapter 2, definitions of e-commerce and consumers' behaviour are presented and examined. After I have given some definitions to set the framework of this paper, I'd like to discuss the impact of typical internet characteristics on the behaviour of internet users. The focus of the practical approach (chapter 3) is directed at the present status quo of e-commerce in society. From consumers' point of view advantages and disadvantages of e-

commerce were analysed and the following questions were discussed: How many people buy online, who are these people and what are they buying most? Why do some segments not buy online? In order to answer these questions a brief look at several e-commerce studies is necessary. Chapter 4 repeats the main conclusions of this paper.
