**Making Magic** Randall Styers 2004-01-15 Since the emergence of religious studies and the social sciences as academic disciplines, the concept of "magic" has played a major role in defining religion and in mediating the relation of religion to science. Across these disciplines, magic has regularly been configured as a definitively non-modern phenomenon, juxtaposed to distinctly modern models of religion and science. Yet this notion of magic has remained stubbornly amorphous. In *Making Magic*, Randall Styers seeks to account for the extraordinary vitality of scholarly discourse purporting to define and explain magic despite its failure to do just that. He argues that this persistence can best be explained in light of the Western drive to establish and secure discursive norms for modern identity, norms based on narrow forms of instrumental rationality, industrious labor, rigidly defined sexual roles, and the containment of wayward forms of desire. Magic has served to designate a form of alterity or deviance against which dominant Western notions of appropriate religious piety, legitimate scientific rationality, and orderly social relations are brought into relief. Scholars have found magic an invaluable tool in their efforts to define the appropriate boundaries of religion and science. On a broader level, says Styers, magical thinking has served as an important foil for modernity itself. Debates over the nature of magic have offered a particularly rich site at which scholars have worked to define and to contest the nature of modernity and norms for life in the modern world.

**War Magic** Douglas Farrer 2016-09-01 This compelling volume explores how war magic and warrior religion unleash the power of the gods, demons, ghosts, and the dead. Documenting war magic and warrior religion as they are performed in diverse cultures and across historical time periods, this volume foregrounds embodiment, practice, and performance in anthropological approaches to magic, sorcery, shamanism, and religion. The authors go beyond what magic 'represents' to consider what magic does. From Chinese exorcists, Javanese spirit siblings, and black magic in Sumatra to Tamil Tiger suicide bombers, Chamorro spiritual re-enchantment, tantric Buddhist war magic, and Yanomami dark shamans, religion and magic are re-evaluated not just from the practitioner's perspective but through the victim's lived experience. These original investigations reveal a nuanced approach to understanding social action, innovation, and the revitalization of tradition in colonial and post-colonial societies undergoing rapid social transformation.

**Der Mensch Martin Luther** Lyndal Roper 2016-09-22 Ein neues Bild Martin Luthers, eine einfühlsame, mehrfach ausgezeichnete Biographie, die uns Luther so nahe bringt wie nie zuvor. Hier erfahren wir, wer Luther wirklich war und warum gerade er zum großen Reformator wurde, der die Welt aus den Angeln hob. Die renommierte Oxford-Historikerin Lyndal Roper hat sich aufgemacht, Luthers ganze Persönlichkeit zu verstehen, seine innere Welt und die Beziehungen zu seinen Freunden nachzuvollziehen. Dafür hat sie seine Schriften und vor allem seine Briefe noch einmal neu gelesen und zahlreiche Dokumente über Luther und sein Umfeld ausgewertet. Sie schildert den Reformator als Mann, der mit beiden Beinen im Leben stand, als Menschen aus Fleisch und Blut. Für Luther waren der Körper und die Sexualität Teil des Mensch-Seins, er wollte den Körper vom Makel der Sünde befreien. Sein Glaube an die Einheit von Körper und Geist führt zum Kern seiner Theologie, der zu einem der großen Streitpunkte des Christentums werden sollte: Luthers unumstößliche Überzeugung, dass Christus bei der Eucharistie leibhaftig anwesend ist. Erst durch die lebendige Darstellung von Luthers innerer Entwicklung wie auch seiner Beziehungen und Freundschaften wird deutlich, warum und wie es zur Reformation kommen konnte. Eine großartige Lektüre, ein Lesevergnügen für alle, die Luther und die Reformation neu entdecken oder erstmals kennen lernen wollen – eine neue Luther-Biographie für unsere Zeit. Opulent ausgestattet mit mehr als 100 Abbildungen in Schwarzweiß und Farbe. "Ein brillanter Blick auf Luther als Mensch." Professor Dr. Karl-Heinz Göttert "Lyndal Roper bürstet Luther gegen den Strich und legt neue, bislang unerkannte Facetten des großen Reformators frei." Professor Dr. Thomas Kaufmann "Lyndal Roper ... zählt zu den prägenden Gestalten der internationalen Geschichtswissenschaft." Aus der Begründung der Jury zur Verleihung des Gerda Henkel Preises 2016 an Lyndal Roper

**The Anthropology of Magic** Susan Greenwood 2020-05-28 Magic is arguably the least understood subject in anthropology today. Exotic and fascinating, it offers us a glimpse into another world but it also threatens to undermine the foundations of anthropology due to its supposed irrational and non-scientific nature. Magic has thus often been 'explained away' by social or psychological reduction. The Anthropology of Magic redresses the balance and brings magic, as an aspect of consciousness, into focus through the use of classic texts and cutting-edge research. Suitable for student and scholar alike, The Anthropology of Magic updates a classical anthropological debate concerning the nature of human experience. A key theme is that human beings everywhere have the potential for magical consciousness. Taking a new approach to some perennial topics in anthropology - such as shamanism, mythology, witchcraft and healing - the book raises crucial theoretical and methodological issues to provide the reader with an engaging and critical understanding of the dynamics of magic. **Religions in Practice** John R. Bowen 2017 Religions in Practice provides a comprehensive and primarily theme-based overview for students who are being introduced to the anthropology of religion. While covering traditional topics like magic, witchcraft, and spiritual healing, the book also addresses key contemporary subjects such as migration, nationalism, transnationalism, law, and secularism. It offers an issues-oriented perspective on everyday religious behaviors and examines small-scale societies as well as major, established religions. Bowen successfully balances the presentation of theory and concepts with rich case study examples, integrating theoretical discussion with a wide range of cross-cultural ethnographic material. This seventh edition has been updated throughout and the opening chapters have been reworked to focus more clearly on the question of what is religion and on approaches to studying religion. There is also a new final chapter on violence and religion. The book now contains a greater number of illustrations and each chapter ends with questions for discussion. **Handbook of Religion and the Authority of Science** Jim R. Lewis 2010-11-19 The present collection examines the many different ways in which religions appeal to the authority of science. The result is a wide-ranging and uniquely compelling study of how religions adapt their message to the challenges of the contemporary world.

**Magic, Witchcraft and the Otherworld** Susan Greenwood 2020-08-02 Anthropology's long and complex relationship to magic has been strongly influenced by western science and notions of rationality. This book takes a refreshing new look at modern magic as practised by contemporary Pagans in Britain. It focuses on what Pagans see as the essence of magic - a communication with an otherworldly reality. Examining issues of identity, gender and morality, the author argues that the otherworld forms a central defining characteristic of magical practice. Integrating an experiential ethnographic approach with an analysis of magic, this book asks penetrating questions about the nature of otherworldly knowledge and argues that our scientific frameworks need re-envisioning. It is unique in providing an insider's view of how magic is practised in contemporary western culture.

**Ritual and Belief** David Hicks 2010-03-15 Ritual and Belief: Readings in the Anthropology of Religion is a collection of 41 readings in religion, magic, and witchcraft. The choice of readings is eclectic: no single anthropological approach or theoretical perspective dominates the text. Theoretical significance, scholarly eminence of the author, and inherent interest provide the principal criteria, and each reading complements its companion chapters, which are pedagogically coherent rather than ad hoc assemblages. Included among the theoretical perspectives are structural-functionalism, structuralism, Malinowskian functionalism, cultural materialism, and cultural evolutionism; also included are the synchronic and diachronic approaches. The book offers a mixture of classic readings and more recent contributions, and the 'world religions' are included along with examples from the religions of traditionally non-literate cultures. As diverse a range of religious traditions as possible has been embraced, from various ethnic groups, traditions, and places.

**Witchcraft, Oracles and Magic Among the Azande** Kitty Wheeler 2017-07-05 The history of anthropology is, to a large extent, the history of differing modes of interpretation. As anthropologists have long known, examining, analyzing and recording cultures in the quest to understand humankind as a whole is a vastly complex task, in which nothing can be achieved without careful and incisive interpretative work. Edward Evans-Pritchard's seminal 1937 Witchcraft, Oracles, and Magic Among the Azande is a model contribution to anthropology's grand interpretative project, and one whose success is based largely on its author's thinking skills. A major issue in anthropology at the time was the common assumption that the faiths and customs of other cultures appeared irrational or illogical when compared to the "civilized" and scientific beliefs of the western world. Evans-Pritchard sought to challenge such definitions by embedding himself within a tribal culture in Africa - that of the Azande - and attempting to understand their beliefs in their proper contexts. By doing so, Evans-Pritchard proved just how vital context is to interpretation. Seen within their context, he was able to show, the beliefs of the Azande were far from irrational - and magic actually formed a coherent system that helped mould a functional community and society for the tribe. Evans-Pritchard's efforts to clarify meaning in this way have proved hugely influential, and have played a major part in guiding later generations of anthropologists from his day to ours.

**Anthropology of Religion** 2014

**Magic, Witchcraft, and Religion** Pamela A. Moro 2008 This comparative reader takes an anthropological approach to the study of religious beliefs, both strange and familiar. The engaging articles on all key issues related to the anthropology of religion grab the attention of students, while giving them an excellent foundation in contemporary ideas and approaches in the field. The multiple authors included in each chapter represent a range of interests, geographic foci, and ways of looking at each subject. Divided into ten chapters, this book begins with a broad view of anthropological ways of looking at religion, and moves on to some of the core topics within the subject, such as myth, ritual, and the various types of religious specialists.

**Magic, Witchcraft, and Religion in the Media (Revised Second Edition)** Liam D. Murphy 2016-08-18 Western popular culture is saturated with ideas drawn from religious institutions and a variety of other forms of awareness. In an age that many view as secular, news accounts are replete with sensationalist stories about inexplicable supernatural events. The Occult, mythology, vampires, zombies, ghosts and apparitions, and paranormal activity are but a few of the supernatural or cosmological themes and images that are felt in everyday life. Magic, Witchcraft, and Religion in the Media, represents a unique effort to capture a cross-section of these events in media reportage and analyze them through the lens of anthropology. The essays selected for this text, which are drawn from a variety of news media and online sources, are clustered around important themes and discussed in terms of their impact on society. They illustrate how classic observations and theory made by social and cultural anthropologists have real world application in everyday American life. This is an ideal supplemental text for introductory and general education courses on "the anthropology of religion," yet it is accessible to an educated public. Liam D. Murphy is a professor of anthropology at California State University, Sacramento. He is the author of many articles and research papers on religion, politics, and identity, published in such peer-reviewed journals as the Journal of Ritual Studies, the Journal of the Society for the Anthropology of Europe, Anthropology in Action, and the Anthropological Journal of European Cultures. He is also co-author (with Paul A. Erickson) of A History of Anthropological Theory (UTP Higher Education, 2013) and co-editor (with Paul A. Erickson) of Readings for a History of Anthropological Theory (UTP Higher Education, 2013). A specialist on religion in Northern Ireland, Murphy is also the author of Believing in Belfast: Charismatic Christianity after the Troubles (Carolina Academic Press, 2010). His current ethnographic research focuses on heavy metal and cultural identity in Western France.

**Anthropology and Religion** Robert L. Wenzler 2012 Drawing from ethnographic examples found throughout the world, this revised and updated text, hailed as the "best general text on religion in anthropology available," offers an introduction to what anthropologists know or think about religion, how they have studied it, and how they interpret or explain it since the late 19th century.
